**DETAILED ACTION**

1. The following is an examiner's statement of reasons for allowance:

The prior art does not teach or fairly suggest an apparatus for taking an image of a subject comprising mode setting means setting either of first and second modes; driving means for driving the imaging device, which, in the first mode, produces first vertical drive signals that cause signal charges produced in each of the photosensitive sections to be transferred from a corresponding one of the vertical transfer paths to the horizontal transfer path at a first normal transfer rate and which, in the second mode, produces second vertical drive signals that cause signal charges produced in each of the photosensitive sections to be transferred from a corresponding one of the vertical transfer paths to the horizontal transfer path at a second transfer rate  $N$  times the first normal transfer rate so that pixel signals from each of the vertical transfer paths are added together in the horizontal transfer path, and, in each of the first and second modes, produces horizontal transfer signals that cause signal charges in the horizontal transfer path to be transferred to outside of the imaging device as a line of image signal; processing means for processing the image signal read out of the horizontal transfer path, the processing means, in the first mode, performing processing on the image signal output from the horizontal transfer path for conversion into image data, and, in the second mode, subjecting pixel signals in image signal from the horizontal transfer path which correspond to pixels arranged in the horizontal direction to addition and averaging and processing the resulting image signal for conversion into image data; and further comprising exposure control means for controlling the amount of light falling on the imaging device, the

exposure control means setting a target exposure value in the second mode to I/N a target value in the first mode.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
